I have concluded to offer at private sale, my celebrated Collection of the Coins of New Jersey. It comprises all the pieces described in my work published in 1881, excepting 8 — seven of the latter number — being represented by electrotypes. (all unique pieces)

A number of the pieces are unique. Many of them are the finest specimens known. For instance a pair of the Mack Newbies, quite uncirculated. Running horse on the reverse after the legend. Punctuations with quatrefoil before & after legend. & many others that should be examined to be appreciated. I want $1000 for the entire

Collection — One of my finest books will also accompany it.

I also have a Silver Dollar with the names of the States in the rings, in almost proof condition. Crosby mentions it as being unique & in the Collection of C. I. Bushnell. When the B. Collection was offered for sale this piece was not found in it. I suspect Bushnell never owned one, but knew of this which was the property of a friend of his. If this is correct my piece is unique & of course very interesting I want $500— for it.

Nobody but my wife knows of my design to sell the foregoing. Hence I request that may be strictly confidential. If J.W.G. could name a time to inspect the pieces, I should take pleasure in showing them

Very respectfully
Elliott.
